face. 2. Identify the eyes, which have a nictitating membrane that serves to moisten the eye. 3. Identify the tympanic membrane, or eardrum. It is located behind each eye. 4. Find the external nares or nostrils.

Frog Dissection - FLIPPED OUT SCIENCE

Students can examine the external anatomy of the frog and discuss the advantages of the frog ' s coloration, webbed feet, and muscular tongue, for example. Dissecting scissors and a couple incisions through skin and muscle reveal the internal organs, which are easily seen as distinct entities. As students explore the internal anatomy, have them explain why structures, such as the fat bodies and intestine, are important to survival.
