# Download File PDF From Rodinia To Pangea The Lithotectonic Record Of The Appalachian Region Memoirs Geological Society Of America

Rodinia is generally considered to be the earliest supercontinent. It broke up, and through plate tectonics (as explained by the Wilson Cycle), the land masses reformed to create Pangea. Most geological evidence only predates back to Pangea, so Rodinia has been much harder for geologists to study.

~~Is there a difference between Pangea and Rodinia?~~

Rodinia formed at c. 1.23 Ga by accretion and collision of fragments produced by breakup of an older supercontinent, Columbia, assembled

Download File PDF From Rodinia To Pangea The Lithotectonic Record Of The Appalachian Region Memoir Geological Society Of America  
by global-scale 2.0–1.8 Ga collisional events. Rodinia broke up in the Neoproterozoic with its continental fragments reassembled to form Pannotia 633–573 million years ago.

It was short-lived and broke apart about 500 million years ago. It was the fragments of Pannotia that formed Pangea about 335 million years ago.

~~Pangea: The Supercontinent | Science Trends~~  
Gondwana and Rodinia are two supercontinents that scientists support the existence of that were probably around prior to Pangea. Scientists predict that supercontinents will continue to appear. Today, the world's continents are slowly moving away from the Mid-Atlantic Ridge toward the middle of the Pacific Ocean.

~~History of the Supercontinent Pangea~~  
ThoughtCo

Rodinia existed between 1.1 billion and 750 million years ago. It formed from parts of an older and poorly understood supercontinent, Rodinia broke up in the first period of the Neoproterozoic, the Tonian. Later its continental fragments were re-assembled to form Pangaea 300–250 million years ago.
