HESI for Nursing (RN) - Elsevier Education

Hyponatremia is a serum sodium level less than 135 mEq/L. Hyponatremia can occur secondary to SIADH. The client with an inadequate daily water intake, watery diarrhea, or diabetes insipidus is at risk for hypernatremia. The nurse is caring for a client with leukemia and notes that the client has poor skin turgor and flat neck and hand veins.

comprehensive, all-in-one review of the information you need to know. Written in an easy-to-read outline format, this study tool breaks down chapters by clinical areas and concepts emphasized on the NCLEX-RN exam. Rationales are provided for any incorrect answers or areas of weakness. The companion Evolve website offers 700 practice questions, giving you valuable practice in the same electronic testing format you will experience on your nursing school exit exam and on the NCLEX-RN exam.

Essential for NCLEX, course and competency review, this resource is a complete, concentrated outline of nursing fundamentals. Each chapter contains objectives, pre- and post chapter tests with comprehensive rationales, vocabulary review, practice to pass exercises, critical thinking case studies, as well as NCLEX alerts and new test-taking strategies. Content includes all of the "need-to-know" facts covering the nursing process, physical assessment, communication, professional standards, health promotion through the lifespan, and more.

Get the most out of your textbook with this helpful study tool! Corresponding to the chapters in Fundamentals of Nursing, 8th Edition, by Patricia Potter et al., this study guide helps you understand key concepts with review questions, exercises, and learning activities. Skills checklists on an Evolve companion website help you learn and master important nursing procedures. Preliminary Readings refer back to related chapters in Fundamentals of Nursing, 8th Edition. Comprehensive Understanding sections help you master the key topics and main
