book. Make exam revision as easy as 1, 2, 3. Study the questions with model answers on the left pages. Have a go at fresh questions from the same topic on the right. Breeze through two complete practice papers. ClearRevise is all about making your revision easy. At the end of the course, doing practice papers is useful - but an exam tutor can make a big difference. This book helps provide support from both angles and will really help you to ace the exam. The first section is your exam tutor. It shows you example questions with model answers. Just like a tutor, it gives you exam tips and lets you know what the examiner is looking for. Secondly, you are then given similar questions from the same topic for you to have a go at, applying your knowledge and tips. With over 400 marks in this section and all the answers provided you'll easily revise the topics as you go. Lastly, there are two complete exam papers written in the same style as the live OCR papers to try. They're exactly the same length and marks as the real exam, providing a realistic experience and a great opportunity to show how much you've progressed.

This text engages every student and stimulates their interest in science. It provides a simple and clear approach to all resources available, with all the help and support you need to teach the new specifications with ease and make the transition as smooth as possible.

Manage your own revision with step-by-step support from experienced teachers and examiners Sean O'Byrne and George Rouse. Use specific case studies to improve your knowledge of Computer Science.

The aim of this book is to provide an accessible text for students, covering each of the elements in the OCR GCSE (9-1) Computer Science specification J276. It will be invaluable both as a course text and in revision for students nearing the end of the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 5 and 6 of the textbook cover algorithms and programming concepts with a theoretical approach to provide students with experience of writing, tracing

and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections cover one of the major topics in this course, and each subtopic contains sample examination questions from past papers, which can be set as homework.

Board-specific Teacher Support Packs provide advice and assistance on how to approach this new qualification. This Pack is appropriate for OCR and includes information on how to prepare students for external assessment and how to assist them in preparing their portfolios.

Improve exam skills, check understanding and familiarise students with the types of questions they will face in the OCR GCSE Computer Science exams. This photocopiable pack of exam-style questions, sample answers and mark schemes can be used flexibly for mocks, classwork or homework. Reinforce the skills and knowledge that students need for their exams, selecting exam question worksheets to focus on tricky topics or revise more broadly across the course Pick and choose whether you assign the questions in test conditions or use them alongside the sample answers, encouraging students to reflect on their responses Help students understand what a 'good' answer looks like, sharing sheets of sample answers with examiner comments and mark schemes Mark students' work more easily, consulting the examiner comments and mark schemes yourself or giving them to students for self/peer-marking activities
