Knowing the sequence of operation of a gas furnace will save time and money on troubleshooting calls. We see time and time again, that technicians order multiple parts to repair a gas furnace. Did the gas valve, control board, ignitor, and limit switch really all fail at the same time? Probably not.

The furnace control board should start the blower motor within 1 minute after igniting the burners. If the blower starts by turning the thermostat fan switch to the "On" position, but does not come on automatically after the burners have ignited, this may indicate a faulty control board. Bad Belt. Some older gas furnaces use a belt-drive blower ...
