What exactly does an Engineering Geologist do? Investigation, analysis and prediction of ground behaviour in the context of civil engineering, development, mineral extraction, water development, ground/water/groundwater interfaces or similar. Risk assessment and mitigation of existing natural and manmade geohazards including abandoned mine workings and contaminated land.

---

Chief Geologist Royal Engineers Profile  
Engineering geologists are in demand in the construction, energy and environmental sectors for their engineering, geotechnical and investigative skills. As an engineering geologist, you'll use detailed technical analysis of soil, rock, groundwater and other natural conditions, as well as the risk assessment of geological hazards, to determine the suitability of a site for construction development.
