These advances in algebra strongly influenced the curricular reforms that began in the 1960s, one of the results of which was that the amount of geometry included in school curricula around the world was reduced, sometimes severely so, especially for pupils aged 11 -19. Recently, however, there has begun a renaissance in geometry.

Geometry (from the Ancient Greek: γεωμετρία; geo-"earth", -metron "measurement") is a branch of mathematics concerned with questions of shape, size, relative position of figures, and the properties of space. A mathematician who works in the field of geometry is called a geometer.. Geometry arose independently in a number of early cultures as a practical way for dealing with lengths ...
