companies. The Maren group signed the contract for its first geothermal power plant in the Germencik area with Ormat in February 2010.

Ormat successfully starts up three geothermal power plants ...

Ormat has built more than 2,100 MWs of geothermal capacity in more than 150 geothermal power plants worldwide. We are experts in applying more technologies, including conventional steam, binary, combined cycle and integrated two-level unit technologies to harvest this abundant source of energy from the earth. Customized Solutions

Ormat Technologies Inc. - Ormat Technologies Inc ...

Advertisement. In a release today morning, U.S. time, Ormat Technologies, Inc. (NYSE: ORA) announced that it has resumed operation of the Puna Geothermal Power Plant, which supplies electricity to the Hawaii Island grid, two and a half years after the eruption of the Kilauea Volcano disrupted operations. Electricity production at Puna resumed on November 5th, 2020, and the plant is currently delivering between 1 to 2 MW of energy to the utility grid.

Ormat resumes operation of the Puna Geothermal power plant ...

quality. Ormat supplied the ORC power unit while the DOE installed and operated the facility for a 12-month testing period. POWER GENERATION UNIT The unit was designed, constructed, and supplied by Ormat Nevada Inc. Design was based on Ormat's ex-perience and operation of geothermal power plants in Nevada, California, Hawaii, and Austria.

Ormat: Low-Temperature Geothermal Power Generation

The fluid is extracted from an underground reservoir and flows from the wellhead through pipelines to heat exchangers in the Ormat Energy Converter (OEC). Inside the heat exchangers, the geothermal fluid heats and vaporizes a secondary working fluid which is organic, with a low boiling point.

Ormat's recovery plan included building a new electricity substation and adding new geothermal wells. The company currently expects that completion of additional well field work, planned to occur over the next 6 months, will enable the power plant to further ramp up production, with the goal of resuming full operations by the middle of 2021.

Ormat Resumes Operation of Puna Power Plant

Description The complex consists of three binary cycle geothermal power stations, each with a nameplate capacity of 10 MW. Mammoth Pacific 1 (MP1) was commissioned in 1984 and was the first air-cooled geothermal power station in the world. Mammoth Pacific 2 (MPIO) and PLES-1 were both commissioned in 1990 and use the same air-cooled technology.
