From its origins the Italian battlefields of the Second World War, to movie roles as Audrey Hepburn's transport in Roman Holiday and Sting's stylish companion in Quadrophenia and on through the current vintage revival, the classic Italian motor scooter is an enduring design classic from the 20th century. Scootermania celebrates the superbly simple vehicles that are so symbolic of freedom, style and the modern world. Originating in the 1940s in Milan and Pontedera, Tuscany, the scooter became an enduring transport choice for young people and urban environments. Early chapters look at scooter racing and long-distance attempts, and their role as an anti-tank weapon in the French army. There is engaging coverage of place of scooters in popular culture from films, music and fashion including the way that a host of disparate groups has made the bikes their own ¶ from the British Mods of the 1960s and 1980s to their role in American and Japanese fashion and in their Italian homeland. The evolution and design of classic models as the Vespa 150 GS and the Lambretta Li 150 Series 3 are covered while scooter stars such as Enrico Piaggio and Georges Monneret are celebrated in their own words. The book also includes a number of specially photographed features on modern scooter designers, collectors and artists.

A service and repair manual with generic model coverage, suitable for 50 to 250cc scooters with carburettor engines. Includes a data section on the following models Aprilia SR50 (94-99), Rally 50, Sonic FT and GP, Leonardo 125.

This book explores the practical and symbolic resources of legitimacy which the elites of medieval Scandinavia employed to establish, justify, and reproduce their social and political standing between the end of the Viking Age and the rise of kingdoms in the thirteenth century. Geographically the chapters cover the Scandinavian realms and Free State Iceland. Thematically the authors cover a wide palette of cultural practices and historical sources: hagiography, historiography, spaces and palaces, literature, and international connections, which rulers, magnates or ecclesiastics used to compete for status and to reserve haloing glory for themselves. The volume is divided in three sections. The first looks at the sacral, legal, and acclamatory means through which privilege was conferred onto kings and ruling families. Section Two explores the spaces such as aristocratic halls, palaces, churches in which the social elevation of elites took place. Section Three explores the traditional and novel means of domestic distinction and international cultural capital which different orders of elites ¶ knights, powerful clerics, ruling families etc. ¶ wrought to assure their dominance and set themselves apart vis-à-vis their peers and subjects. A concluding chapter discusses how the use of symbolic capital in the North compared to wider European contexts.

All common engine, chassis and electrical systems fully explained and illustrated. Topics covered include engine cycles and layouts, carburetors and fuel injection, ignition systems, clutches, gearbox, engine lubrication and cooling, wheels, tires, braking systems, suspension, steering, handling, design and electrical systems.
