The text aims to help students develop their knowledge, understanding, skills, attitudes and values in relation to the biophysical and human environments.

The challenge of teaching international studies is to help students think coherently about the multiple causes and effects of global problems. In International Studies: Global Forces, Interactions, and Tensions, award-winning scholars Scott Straus and Barry Driscoll give students a clear framework that pinpoints how key factors¶forces, interactions, and tensions¶contribute to world events, with both global and local consequences. The authors first show students how to look for common patterns in global issues by introducing four world-shaping forces: global markets, shifting centers of power, information and communications technologies, and global governance. They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key challenges. The framework enables students to ask and answer for themselves¶Who is interacting? Where did such interactions develop? What policies or institutions govern them? Why are they getting certain global and local reactions? Students then apply the framework to the global problems that matter most to them: human rights abuses, economic inequality, terrorism, forced migration, pandemics and global health responses, climate change, food security, and more. International Studies raises the bar for the Introduction to IS course, moving beyond interdisciplinary, and into the realm of critical analysis to increase student relevancy and motivation. Give your students the SAGE edge! SAGE edge offers a robust online environment featuring an impressive array of free tools and resources for review, study, and further exploration, keeping both instructors and students on the cutting edge of teaching and learning. This attractive, full-colour coursebook covers the seven topics of the Higher Level extension (HL) syllabus in Geography for the International Baccalaureate (IB) Diploma. It explores the HL theme, Global Interactions, emphasising the various scales at which issues can be studied, and identifying and carefully explaining key global issues. The coursebook guides students through the HL syllabus, building geographical skills and making connections to other areas of the Geography course and to concepts in the Theory of Knowledge. It also encourages detailed study of primary and secondary sources, developing students' analytical skills. The content is tailored to the requirements and assessment objectives of the IB syllabus, making it relevant to the way in which the subject is taught, assessed and examined.

Global Interactions 2 HSC Course Second Edition has been written by a group of experienced geography educators for the HSC Geography course in New South Wales. The text aims to help students develop their knowledge, understanding, skills, attitudes and values in relation to the biophysical and human environments.

Print+CourseSmart

A new edition of a book that takes a comprehensive look at the ways economic processes affect global environmental outcomes. This comprehensive and accessible book fills the need for a political economy view of global environmental politics, focusing on the ways international economic processes affect environmental outcomes. It examines the main actors and forces shaping global environmental management, particularly in the developing world. Moving beyond the usual emphasis on international agreements and institutions, it strives to capture not only academic theoretical debates but also views on politics, economics, and the environment within the halls of global conferences, on the streets during antiglobalization protests, and in the boardrooms of international agencies, nongovernmental organizations, and industry associations. The book maps out an original typology of four contrasting worldviews of environmental change¶those of market liberals, institutionalists, bioenvironmentalists, and social greens¶and uses them as a framework to examine the links between the global political economy and ecological change. This typology provides a common language for students, instructors, and scholars to discuss the issues across the classical social science divisions.The second edition of this popular text has been thoroughly revised and updated to reflect recent events, including the food crisis of 2007-2008, the financial meltdown of 2008, and the Copenhagen Climate Conference of 2009. Topics covered include the environmental implications of globalization; wealth, poverty, and consumption; global trade; transnational corporations; and multilateral and private finance.

Global Interactions in the Early Modern Age is an interdisciplinary introduction to cross-cultural encounters in the early modern age (1400¶1800) and their influences on the development of world societies. In the aftermath of Mongol expansion across Eurasia, the unprecedented rise of imperial states in the early modern period set in motion interactions between people from around the world. These included new commercial networks, large-scale migration streams, global biological exchanges, and transfers of knowledge across oceans and continents. These in turn wove together the major regions of the world. In an age of extensive cultural, political, military, and economic contact, a host of individuals, companies, tribes, states, and empires were in competition. Yet they also cooperated with one another, leading ultimately to the integration of global space.

The challenge of teaching international studies is to help students think coherently about the multiple causes and effects of global problems. In International Studies: Global Forces, Interactions, and Tensions, award-winning scholars Scott Straus and Barry Driscoll introduce students to the foundations of the course; the major actors, institutions and theories; as well as the contemporary problems that will matter most to students. In the fully updated Second Edition, the authors give students a clear framework that pinpoints how key factors¶forces, interactions, and tensions¶contribute to current world events and global problems like human rights abuses, economic inequality, pandemic and global health responses, and food security. The book raises the bar for the Introduction to International Studies course and is relevant to students from a wide variety of backgrounds with diverse interests in geography, sociology, political science, and anthropology. Included with this text¶The online resources for your text are available via the password-protected Instructor Resource Site. Learn more.

The essential textbook on agent-based modeling¶now fully updated and expanded Agent-Based and Individual-Based Modeling has become the standard textbook on the subject for classroom use and self-instruction. Drawing on the latest version of NetLogo and fully updated with new examples, exercises, and an enhanced text for easier comprehension, this is the essential resource for anyone seeking to understand how the dynamics of biological, social, and other complex systems arise from the characteristics of the agents that make up these systems. Steven Railsback and Volker Grimm lead students stepwise through the processes of designing, programming, documenting, and doing scientific research with agent-based models, focusing on the adaptive behaviors that make these models necessary. They cover the fundamentals of modeling and model analysis, introduce key modeling concepts, and demonstrate how to implement them using NetLogo. They also address pattern-oriented modeling, an invaluable strategy for modeling real-world problems and developing theory. This accessible and authoritative book focuses on modeling as a tool for understanding real complex systems. It explains how to pose a specific question, use observations from actual systems to design models, write and test software, and more. A hands-on introduction that guides students from conceptual design to computer implementation to analysis Filled with new examples and exercises and compatible with the latest version of NetLogo Ideal for students and researchers across the natural and social sciences Written by two leading practitioners Supported by extensive instructional materials at [www.railsback-grimm-abm-book.com](#)
