The Sanding Guide Coat helps to create the perfect finish by highlighting fine sanding and scratch marks as visible blue lines. You then simply sand them away with sand paper as you go.

## [Sanding Guide Coat | International](#)

After the guide coat is applied, we will use long sanding blocks to sand the guide coat off. What will happen is that the guide coat will sand off of the high spots, and will stay in place in any low spots. This will allow us to see any imperfections. If the low spots are low enough we will use a glaze to very lightly build up the surface.

For the pre-guidecoat sanding use the peel as your guidecoat. Cut the peel down so that only the pits are left using the 600-800 and then dry guidecoat and use p1000 to remove all of the guidecoat. After 1000 it's on to 1500 and 2000 and then buff. The guidecoat doesn't work on unsanded clear as it doesn't stick to anything in my experience.
