Lyx is a "document processor" based on Latex but its use needs some knowledge of Latex. Whilst my requirement is for maths, I quickly came to think that Latex was OK for normal use because the resulting documents look so much better on the page.

Guide to LaTeX (4th Edition): Kopka, Helmut, Daly, Patrick ...

LaTeX deals with the $+$ and $-$ signs in two possible ways. The most common is as a binary operator. When two maths elements appear on either side of the sign, it is assumed to be a binary operator, and as such, allocates some space to either side of the sign. The alternative way is a sign designation. This is when you state whether a mathematical quantity is either positive or negative. This ...
