and heat loss and thus to  
an increase of core body  
temperature  
(hyperthermia).

---

Heat Stress - an  
overview |

ScienceDirect Topics

Heat stress occurs when  
the body cannot get rid  
of excess heat. When  
this happens, the body's  
core temperature rises

# Access PDF Heat Stress In The U

and the heart rate increases. As the body continues to store heat, the person begins to lose concentration and has difficulty focusing on a task, may become irritable or sick, and often loses the desire to drink.

Heat Stress Updated  
Signs and symptoms An  
early stage of  
hyperthermia can be  
"heat exhaustion" (or  
"heat prostration" or  
"heat stress"), whose  
symptoms can include  
heavy sweating, rapid  
breathing and a fast,  
weak pulse. If the  
condition progresses to  
heat stroke, then hot,  
dry skin is typical as
