Heavy metals can be managed by reducing the use of treated effluent or by adequately treating sewage before it is used for irrigation. In Algeria, heavy metal contamination of vegetables (e.g., tomatoes, potatoes, and cucumbers) was reduced by ~85% simply by avoiding inadequately treated wastewater (Cherfi et al., 2015).

Heavy metals in food crops: Health risks, fate, mechanisms ...

A Heavy Metal Solution The mining industry is under constant scrutiny when it comes to its processes for treating contaminated wastewater. The pressure on the industry to adopt more advanced and environmentally sustainable treatment processes is increasing as the mining industry experiences high growth rates.

A Heavy Metal Solution | WWD

"Heavy Metals: Problems and Solutions" is divided into three sections dealing with basic geochemical processes, remediation and case studies. The basic geochemical processes are discussed with respect to mobility in the environment and impact as well as methods to derive guidelines for heavy metals.
