Updated and revised with more examples and expanded discussions, this second edition continues the aim of providing teachers with a solid understanding of the use and function of grammatical structures in American English. The book avoids jargon and presents essential grammatical structures clearly and concisely. Dr. DeCapua approaches grammar from a descriptive rather than a prescriptive standpoint, discussing differences between formal and informal language, and spoken and written English. The text draws examples from a wide variety of authentic materials to illustrate grammatical concepts. The many activities throughout the book engage users in exploring the different elements of grammar and in considering how these elements work together to form meaning. Users are encouraged to tap into their own, often subconscious, knowledge of grammar to consciously apply their knowledge to their own varied teaching settings. The text also emphasizes the importance of understanding grammar from the perspective of English language learners, an approach that allows teachers to better appreciate the difficulties these learners face. Specific areas of difficulties for learners of English are highlighted throughout.

This monograph examines how language contributes to the social coordination of actions in talk-in-interaction. Focusing on a set of frequently used constructions in French (left-dislocation, right-dislocation, topicalization, and hanging topic), the study provides an empirically rich contribution to the understanding of grammar as thoroughly temporal, emergent, and contingent upon its use in social interaction. Based on data from a range of everyday interactions, the authors investigate speakers' use of these constructions as resources for organizing social interaction, showing how speakers continuously adapt, revise, and extend grammatical trajectories in real time in response to local contingencies. The book is designed to be both informative for the specialized scholar and accessible to the graduate student familiar with conversation analysis and/or interactional linguistics.
