(Bear with us, we're going to get a bit technical here.) Our home theater speakers play high frequency sounds (like dialogue) through a "tweeter." And they play both midrange and bass frequencies through a "woofer." By offloading the bass frequencies to Sub, the speaker is freed up to deliver more midrange sound through the woofer.

~~The Ultimate Guide to a Sonos Home Theater | Sonos ...~~

Placing the left and right back speakers: The 7.1 setup adds even more auditory realism to your home theater experience via the addition of two more surround sound channels. These channels should be placed roughly 135-150 degrees behind the viewer and just above head level.

~~How to Place Your Speakers to Maximize Your Home Theater ...~~

Number of speakers. With most home theater systems belonging to the 5.1, 7.1 or 9.2 channels, it would be a good idea to opt for one of these. This essentially means that you need to look at putting together at least five speakers and a subwoofer – three ahead of you, two behind, and one subwoofer.

~~10 Best Home Theater Systems | Ultimate Guide for 2020 ...~~

In all 5.1 channel systems, '5' represent the number of speakers and '.1' represent the sixth channel also called low-frequency effect (LFE) channel. These 5 speakers include two front speakers, two surround speakers, and one front center speaker. As a low-frequency channel, a subwoofer is added to the system.
