A teacher uses differentiated instruction to give every student multiple paths to learning. That includes students who have Individualized Education Programs (IEPs) or 504 plans. It doesn't replace the goals and objectives in a child's IEP or 504 plan. Instead, the teacher personalizes her teaching to help the student meet those goals and objectives.

What The Research Tells Us About Differentiate Instruction. There are three bodies of research worth mentioning. They are: 1) Brain-based Research. 2) Learning Styles and Multiple Intelligences. 3) Authentic Assessment . Brain-based Research on Learning

**How to Differentiate Instruction**

Differentiated instruction is a way of modifying the learning experience to meet students where they are. Because no two students learn the same way, differentiating a lesson makes a teacher's curriculum more accessible to students whose abilities vary from their peers.

**Differentiated Instruction Examples and Strategies**

This is where you can differentiate math instruction using technology. One way I like to differentiate math activities is by assigning digital task cards in Google Classroom. If you have a below average, average and above average group of kids you can assign each group a different set of cards. But this works with whatever levels of abilities you have.

**Differentiate Math Instruction - Easily Using Technology**

The goal of the book is to help teachers determine what differentiated instruction is, why it is appropriate for all learners, how to begin to plan for it, and how to become comfortable enough with student differences to make school comfortable for each learner. Numerous practical examples assist teachers to use instructional strategies such as ...

**How to Differentiate Instruction in Mixed-ability ...**

Once you've collected enough data, you can then differentiate instruction according to their readiness. Aside from your own assessments, you can ask previous teachers of these students for some insight. If possible, you can even look at report cards and past work to give you a better picture of what your students' needs are.

You can differentiate the way the material is delivered, what materials are used, what end products are created, and even how the students are assessed. This article will describe how to...

**Differentiation of Instruction in Teaching Mathematics...**

First published in 1995 as How to Differentiate Instruction in Mixed-Ability Classrooms, this new edition reflects evolving best practices in education, the experiences of practitioners throughout the United States and around the world, and Tomlinson's continuing thinking about how to help each and every student access challenging, high-quality curriculum; engage in meaning-rich learning experiences; and feel at home in a school environment that "fits."

**How to Differentiate Instruction in Academically Diverse ...**

Differentiated instruction allows us to give students the support they need instead of lumping them together in one big group. Smaller groups make it easier to see who has mastered the lesson goals and has acquired the skills to move on. Larger class sizes make it more difficult to zero in on individual student needs.

Buy How to Differentiate Instruction in Mixed-Ability Classrooms, 2nd Edition (Professional Development) 2nd ed. by Tomlinson, Dr Carol Ann (ISBN: 9780871205124) from Amazon's Book Store. Everyday low prices and free delivery on eligible orders.

**How to Differentiate Instruction in Mixed-Ability ...**

The best way to differentiate instruction is to give students a choice in how they show their learning. All students learn in their own way, and they need to be able to show their individual skills and interests. As long as they're able to demonstrate a certain skill, assessment should be more about the process than the product.

**Providing Differentiated Instruction by Giving Students ...**

Problem Solving: The focus in classrooms that differentiate instruction is on issues and concepts rather than "the book" or the chapter. This encourages all students to explore big ideas and expand their understanding of key concepts.

**What Is Differentiated Instruction? | Scholastic**

According to Tomlinson (2000), differentiation means tailoring instruction to meet individual needs, by differentiating the content, process, products, or the learning environment. Online learning already addresses a differentiated learning environment; therefore, online differentiation should focus on the content, process and product.

A good way to differentiate the learning process is to have a series of tiered assignments for each of your lessons. By creating a variety of related tasks at varying difficulty, you'll be able to give specific tasks to certain groups or individual students based on their skill level. They can then work their way up to the highest assignment.
