You work hard. You put in the hours. Yet you feel like you are constantly treading water with "Good Work" that keeps you going but never quite moves you ahead. Or worse, you are mired in "Bad Work"—endless meetings and energy-draining bureaucratic traps. Do More Great Work gets to the heart of the problem: Even the best performers are spending less than a fraction of their time doing "Great Work"—the kind of innovative work that pushes us forward, stretches our creativity, and truly satisfies us. Michael Bungay Stanier, Canadian Coach of the Year in 2006, is a business consultant who's found a way to move us away from bad work (and even good work), and toward more time spent doing great work. When you're up to your eyeballs answering e-mail, returning phone calls, attending meetings and scrambling to get that project done, you can turn to this inspirational, motivating, and at times playful book for invaluable guidance. In fifteen exercises, Do More Great Work shows how you can finally do more of the work that engages and challenges you, that has a real impact, that plays to your strengths—and that matters. The exercises are "maps"—brilliantly simple visual tools that help you find, start and sustain Great Work, revealing how to: Find clues to your own Great Work—they're all around you Locate the sweet spot between what you want

to do and what your organization wants you to do Generate new ideas and possibilities quickly Best manage your overwhelming workload Double the likelihood that you'll do what you want to do All it takes is ten minutes a day, a pencil and a willingness to change. Do More Great Work will not only help you identify what the Great Work of your life is, it will tell you how to do it.

Get ready to question everything you've been told about charity, and to find out how you can truly succeed at making the world a better place. Many of us donate to charitable causes, and millions more work or volunteer for non-profit organizations. Yet virtually none of us have been taught what it means to succeed at doing good, let alone how to do so. In short, we've never been encouraged to treat charity with the seriousness and rigor it deserves. How to be Great at Doing Good is a complacency-shattering guidebook for anyone who wants to actually change the world, whether as a donor, a volunteer, or a non-profit staffer. Drawing on eye-opening studies in psychology and human behavior, surprising interviews with philanthropy professionals, and the author's fifteen years of experience founding and managing top-rated non-profits, this book is an essential read for anyone who wants to do more good with their time and money. Find out how Bill Gates and a team of MIT grads are saving thousands of lives by applying business principles to charity work – and how we can too Peer inside our brains as we donate, and discover how the same chemical forces that make us crave junk food and sex can steer us toward bad charity decisions See why following our passion and doing what we're good at can actually doom our efforts to improve the world Learn how two seemingly identical charities can have jaw-dropping differences in impact, and find out how to pick the best one when donating Sure to generate controversy among non-

profits and philanthropists who prefer business as usual, How to be Great at Doing Good reveals that a more calculated, effective approach to charity work isn't just possible – it's absolutely necessary for those who want to succeed at changing the world.

Addresses the increasing importance of the Internet in scholarly research and teaches the finer points of finding information, distinguishing reputable and disreputable sites, and more.

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison

companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

Highly effective thinking is an art that engineers and scientists can be taught to develop. By presenting actual experiences and analyzing them as they are described, the author conveys the developmental thought processes employed and shows a style of thinking that leads to successful results is something that can be learned. Along with spectacular successes, the author also conveys how failures contributed

to shaping the thought processes. Provides the reader with a style of thinking that will enhance a person's ability to function as a problem-solver of complex technical issues. Consists of a collection of stories about the author's participation in significant discoveries, relating how those discoveries came about and, most importantly, provides analysis about the thought processes and reasoning that took place as the author and his associates progressed through engineering problems.

Presents a series of guidelines to help teachers become more effective in the classroom.

Discover proven strategies for building powerful, world-class brands. It's tempting to believe that brands like Apple, Nike, and Zappos achieved their iconic statuses because of serendipity, an unattainable magic formula, or even the genius of a single visionary leader. However, these companies all adopted specific approaches and principles that transformed their ordinary brands into industry leaders. In other words, great brands can be built—and Denise Lee Yohn knows exactly how to do it. Delivering a fresh perspective, Yohn's *What Great Brands Do* teaches an innovative brand-as-business strategy that enhances brand identity while boosting profit margins, improving company culture, and creating stronger stakeholder relationships. Drawing from twenty-five years of consulting work with such top brands as Frito-Lay, Sony, Nautica, and Burger King, Yohn explains key principles of her brand-as-business strategy. Reveals the seven key principles that the world's best brands consistently implement. Presents case studies that explore the brand building successes and failures of companies of all sizes including IBM, Lululemon, Chipotle Mexican Grill, and other remarkable brands. Provides tools and strategies that organizations can
