Lectures asks how our culture came to frown on using books for any purpose other than reading. When did the coffee-table book become an object of scorn? Why did law courts forbid witnesses to kiss the Bible? What made Victorian cartoonists mock commuters who hid behind the newspaper, ladies who matched their books' binding to their dress, and servants who reduced newspapers to fish 'n' chips wrap? Shedding new light on novels by Thackeray, Dickens, the Brontës, Trollope, and Collins, as well as the urban sociology of Henry Mayhew, Leah Price also uncovers the lives and afterlives of anonymous religious

tracts and household manuals. From knickknacks to wastepaper, books mattered to the Victorians in ways that cannot be explained by their printed content alone. And whether displayed, defaced, exchanged, or discarded, printed matter participated, and still participates, in a range of transactions that stretches far beyond reading. Supplementing close readings with a sensitive reconstruction of how Victorians thought and felt about books, Price offers a new model for integrating literary theory with cultural history. Lectures scholarship, where intense analysis, questioning, and speculation take the lead

John L. Austin was one of the leading philosophers of the twentieth century. The William James Lectures presented Austin's conclusions in the field to which he directed his main efforts on a wide variety of philosophical problems. These talks became the classic *How to Do Things with Words*. For this second edition, the editors have returned to Austin's original lecture notes, amending the printed text where it seemed necessary. Students will find the new text

Legal doctrine—the creation of doctrinal concepts, arguments, and legal regimes built on the foundation of written law—is the currency of contemporary law. Yet law students, lawyers, and judges often take doctrine for granted, without asking even the most basic questions. *How to Do Things with Legal Doctrine* is a sweeping and original study that focuses on how to understand legal doctrine via a hands-on approach. Taking up the provocative invitations from the “New Doctrinalists,” Pierre Schlag and Amy J.

Griffin refine the conceptual and rhetorical operations legal professionals perform with doctrine—focusing especially on those difficult moments where law seems to run out, but legal argument must go on. The authors make the crucial operations of doctrine explicit, revealing how they work, and how they shape the law that emerges. How to Do Things with Legal Doctrine will help all those studying or working with law to gain a more systematic understanding of the doctrinal moves many of our best lawyers make intuitively.

In recent years, computer games have moved from the margins of popular culture to its center. Reviews of new games and profiles of game designers now regularly appear in the New York Times and the New Yorker, and sales figures for games are reported alongside those of books, music, and movies. They are increasingly used for purposes other than entertainment, yet debates about videogames still fork along one of two paths: accusations of debasement through violence and isolation or defensive paeans to their potential as serious cultural works. In How to Do Things with Videogames, Ian Bogost

Lectures contends that such generalizations obscure the limitless possibilities offered by the medium's ability to create complex simulated realities. Bogost, a leading scholar of videogames and an award-winning game designer, explores the many ways computer games are used today: documenting important historical and cultural events; educating both children and adults; promoting commercial products; and serving as platforms for art, pornography, exercise, relaxation, pranks, and politics. Examining these applications in a series of short, inviting, and provocative essays, he argues that

together they make the medium broader, richer, and more relevant to a wider audience. Bogost concludes that as videogames become ever more enmeshed with contemporary life, the idea of gamers as social identities will become obsolete, giving rise to gaming by the masses. But until games are understood to have valid applications across the cultural spectrum, their true potential will remain unrealized. How to Do Things with Videogames offers a fresh starting point to more fully consider games' progress today and promise for the future.

Lectures Getting others to do things is a central part of social interaction in any human society. Language is our main tool for this purpose. In this book, we show that sequences of interaction in which one person's behaviour solicits or occasions another's assistance or collaboration share common structural properties that provide a basis for the systematic comparison of this domain across languages. The goal of this comparison is to uncover similarities and differences in how language and other conduct are used in carrying out social action around the world, including different kinds of requests,
