## **How to remove from Honda 4x4 Fourtrax ATV?**

Pull the carb off, and set it -- fuel-inlet side down -- on an absorbent, disposable mat. Look on the bottom of the carburetor; you'll see four screws securing the carburetor float bowl to the carb body. Remove the screws to expose the jets and float mechanism. Carefully note the position of, and then remove the pilot jet, main jet and starter jet.

## **How to Clean the Carburetor From Cars | It Still Runs**

Place the five-gallon bucket under the carburetor. Using pliers, compress the small metal clamp that secures the fuel hose to the top of the carburetor. Pull the hose off of the carburetor and drain the fuel into a bucket. Using a ratchet set, remove the two bolts securing the fuel tank to the frame at the top of the fuel tank.
