How To Remove a Radiator - YouTube

Step 1, Turn the valves off on either side of the radiator. The valves are usually located just above the base points that extend from the ground. Use a clockwise or tightening motion to turn them off. Step 2, Remove the caps from the top of these valves. They are plastic or resin and they cover the hot metal valves. Use an adjustable wrench to tighten the valves even further. Use the wrench to tighten the nuts at the top of the valve. Step 3, See if you have thermostatic radiator valves that ...
