Human behavior is studied by the social sciences, which include psychology, sociology, economics, and anthropology. In sociology, behavior may broadly refer to all basic human actions, including those which possess no meaning; actions directed at no person. Behavior in this general sense should not be mistaken with social behavior.

Presents major theories for systems addressed in generalist practice This text is part of the Connecting Core Competencies Series. Human Behavior and the Social Environment: Social Systems Theory provides an expanded treatment of systems theory, and applies the theory to common social work concerns. The text links systems to social roles, and provides a framework for critical assessment of the theories from the systems/roles perspective. It assesses the strengths and weaknesses of each theory with regard to the value of each theory for social work practice. Social systems theory remains the focus of this text. In addition theories are identified as grand theories, middle range theories, or focal theories, to assist the student in understanding the scope and application of theories across system sizes. This text breaks new ground in using role theory as a middle range theory to address common features of human systems at a level that is more intuitive for students, and yet detailed enough to stimulate independent thinking. The text addresses the standard repertoire of theories, and in addition presents application of the theories to social issues such as violence and addiction. A better teaching and learning experience This program will provide a better teaching and learning experience!for you and your students. Here's how: Improve Critical Thinking | Links systems processes and concepts to role theory as a middle range perspective. Engage Students | Relates social systems concepts to the contexts of generalist social work practice Explore Current Issues | Provides an integrative perspective for the diverse theories used by social workers Apply CSWE Core Competencies | The text integrates the 2008 CSWE EPAS, with critical thinking questions and practice tests to assess student understanding and development of competency. Support Instructors | An Instructor's Manual and Test Bank, Computerized Test Bank (MyTest), BlackBoard Test Item File, and PowerPoint presentations are included in the outstanding supplements package.

A timely revision in this global age, Human Behavior and the Social Environment, Macro Level develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. * Integrates up-to-date research findings, models, and government statistics * Enhanced discussions of theory, group dynamics, family, community, and the environment * Theoretical concepts and practice implications in each chapter * Highlights the importance of the natural environment and ecology--the "community of the earth"--to human and group behavior * Sets forth a refined understanding of the role of spirituality--the "community of faith"--in people's lives * Focuses on evidence-based theory and research * Teaches from a global, cross-cultural, perspective, highlighting themes of empowerment and social justice * Features dynamic readings, personal narratives, and photographs that highlight each chapter's topic * Accompanied by an online instructor's manual with lecture presentations, chapter summaries, key terms, suggested classroom activities, and a test bank with essay and multiple choice questions at www.oup.com/us/HBSE/ Don't miss the companion volume, Human Behavior and the Social Environment, Micro Level, Second Edition, which offers an eye-opening view of how biological, psychological, and cultural forces influence individuals' behavior.

This addition to Anissa Rogers' bestselling Human Behavior in the Social Environment expands the original text with new chapters on spirituality, families and groups, organizations, and communities. Written in the compact, concise manner of the original text, the new chapters cover mezzo and macro contexts, and offer additional material valuable to two- and three-semester HBSE courses. These new supplemental chapters provide instructors with an opportunity to choose the chapters that best fit the layout of the course: Instructors can use all four new chapters with the core HBSE text; or they may choose one or several to augment the core HBSE text, allowing the text to be customized to the way in which the course is taught. Along with the bestselling core HBSE text, these supplemental chapters are ideal for use in either one-semester or year-long generalist human behavior courses. Why? Because the combined texts are concise and easily used in a one-semester course. But the combined texts also come with a companion set of readings and six unique cases that encourage your students to learn by doing and to apply their knowledge of human behavior to best practices. Go to www.routledgesw.com/hbse to learn more. These additional resources easily allow you to use the text (and its related resources) in a two-semester sequence.

This lively, comprehensive introduction to human behavior in the social environment offers a multidimensional approach to the topic, with discussion of integrative practice, theory, treatment, and services as well as matters pertaining to diversity addressed throughout the text. The text provides solid coverage of foundation knowledge, integrates the biopsychosocial dimensions for assessing social functioning, and offers case studies to illuminate the applied aspects of the content. Furthermore, as part of the Brooks/Cole Empowerment Series, the fifth edition thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2008 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping students connect foundation knowledge with specific practice concerns. Study tables and concept maps (for each discussion of behavior in the development chapters) clarify major phases of biopsychosocial development across the life span. This framework gives students a concrete tool for assessing human behavior from a perspective that reflects the values and knowledge base of the social work profession. Human Behavior and the Social Environment: A Macro, National, and International Perspective is a textbook for one of the primary courses in the social work curriculum titled Human Behavior in the Social Environment. The course is offered usually over two semesters, with one focusing on micro issues (how the individual develops in relation to their social enviroment on an individual, family, and group level). The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions, community, and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization, which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts includes coverage of rural issues, the impact of hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration, and a special section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective A timely approach that examines issues such as rural communities, the impact of disaster on communities, and increasing incarceration rates Provides special emphasis on human needs and social justice End of chapter discussion questions A student glossary Chapter opening photos An appendix that includes three additional higher level macro theories which would make the book applicable to Master's level program This book will also contain a number of features that are essential for any book to be adopted in a HBSE course. They include: End of chapter discussion questions Instructor's manual featuring powerpoint slides and a test bank Student study site for recommended reading, chapter summaries, and flash cards

This new and updated edition of the vital human behavior textbook for graduate-level social work students emphasizes the biopsychosocial framework with a psychodynamic and developmental perspective, with updated information on contemporary thinking and the application of postmodern theory. Written from the perspective of a classroom teacher, faculty advisor, and clinician, Human Behavior in the Social Environment discusses current social issues such as older people, violence, and abuse. The book approaches development through the life cycle, discussing the developmental challenges, tasks, and problems of each stage. Presenting complex concepts in a clear and understandable way, it also examines and integrates systems and organizational factors, as well as the impact of culture on clients and treatment programs. A helpful instructor's manual accompanies this text, and is available as a free download from http://www.routledge.com/9780789034182. Human Behavior in the Social Environment looks at: the biopsychosocial perspective psychoanalytic and ego psychology theories object relations, self psychology, and cognitive-behavioral theories postmodern theories: constructivism, relational therapy, narrative theory, and resilience social systems in the community culture and diversity forms and organizations of the family internal family structures and special family problems reproductive issues, infancy, and early childhood development, middle childhood and adolescence adult development life transitions, turning points, crises, and loss illness and disability; mental health problems and much more! With case vignettes, chapter-by-chapter learning exercises, and additional readings, as well as material from literary works, biographies, and newspapers, this copiously-referenced volume illustrates the complexities of human existence, the multiple social conflicts operating in society, and the relevance of social policy dilemmas. While especially designed to benefit and enlighten graduate social work students it is also a valuable resource for undergraduate social work students as well as beginning and advanced readers in human services such as nursing, medicine, public health, clinical psychology, counseling, who will find this both a helpful review and source of new knowledge.

It also takes into account the expected and unexpected stresses, challenges, and life tasks that can influence development within social environments."--BOOK JACKET.
