A timely revision in this global age, *Human Behavior and the Social Environment, Macro Level* develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. * Integrates up-to-date research findings, models, and government statistics * Enhanced discussions of theory, group dynamics, family, community, and the environment * Theoretical concepts and practice implications in each chapter * Highlights the importance of the natural environment and ecology--the "community of the earth"--to human and group behavior * Sets forth a refined understanding of the role of spirituality--the "community of faith"--in people's lives * Focuses on evidence-based theory and research * Teaches from a global, cross-cultural, perspective, highlighting themes of empowerment and social justice * Features dynamic readings, personal narratives, and photographs that highlight each chapter's topic * Accompanied by an online instructor's manual with lecture presentations, chapter summaries, key terms, suggested classroom activities, and a test bank with essay and multiple choice questions at www.oup.com/us/HBSE/ Don't miss the companion volume, *Human Behavior and the Social Environment, Micro Level, Second Edition*, which offers an eye-opening view of how biological, psychological, and cultural forces influence individuals' behavior.

Zastrow and Kirst-Ashman's *UNDERSTANDING HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT, 10th Edition* looks at the lifespan through the lens of social work theory and practice, covering human development and behavior theories within the context of family, organizational, and community systems. Using a chronological lifespan approach, the book presents separate chapters on biological, psychological, and social impacts at the different lifespan stages with an emphasis on strengths and empowerment. Part of the Brooks/Cole Empowerment Series, this edition is completely up to date and thoroughly integrates the core competencies and recommended practice behaviors outlined in the current Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE). Human Behavior in the Social Environment from an African-American Perspective, Second Edition is an updating of the classic text that presents leading black scholars discussing complex human behavior problems faced by African-Americans in today's society. This new edition provides fresh theories and the latest practical interventions not in the first edition that show, for example, how to enhance a client's coping strategies and resilience by focusing on their strengths rather than their weaknesses. This edition includes a new foreword by former Surgeon General, Dr. Joycelyn Elders. *Human Behavior in the Social Environment from an African-American Perspective, Second Edition* acquaints practitioners with the Black experience, and provides the latest innovative methods of working with this diverse population. This edition also offers new insights on evaluating practice initiatives. Experts and scholars explore and interpret individual and group behaviors, the strength and resilience of the black family, the stresses and problems affecting children, the significant problem of the affects of colorism, the self-esteem and identity issues of biracial children, violence in the criminal justice system, the HIV/AIDS pandemic, the stress and behaviors resulting from belonging to the armed services, and other behavior stemming from progression through the life cycle. Chapters include charts and tables of data, extensive references, and study questions for deeper study for students. Topics in *Human Behavior in the Social Environment from an African-American Perspective, Second Edition* include: the importance of the consideration of the black experience in analyzing black behavior behavior as a response to a hostile social system the black church's role in leading African-Americans resiliency perspective as a positive force the use of strength behaviors for socialization and survival strategies to strengthen roles of fathers in African-American families military culture as a microcosm of the wider society the psychological effects of skin color on self-esteem the No Child Left Behind Act of 2001 and its effects refreshing social work practice to better meet the needs of African-American girls examination of a study on the help-seeking behaviors of young African-American males empirically based creative intervention strategies to alleviate black-on-black crime analysis of street gang behaviors with a program to address it influences of hip hop culture strategies to lessen substance abuse in children practices that help assist administrators and social workers to lessen school violence *Human Behavior in the Social Environment from an African-American Perspective, Second Edition* is a supplementary text that is valuable for undergraduate and graduate students, human service practitioners, mental health and medical counselors, policymakers, school officials, and criminal justice personnel.

Human Behavior and the Social Environment: A Macro, National, and International Perspective is a textbook for one of the primary courses in the social work curriculum titled *Human Behavior in the Social Environment*. The course is offered usually over two semesters, with one focusing on micro issues (how the individual develops in relation to their social environment on an individual, family, and group level). The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions, community, and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization, which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts includes coverage of rural issues, the impact of hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration, and a special section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective A timely approach that examines issues such as rural communities, the impact of disaster on communities, and increasing incarceration rates Provides special emphasis on human needs and social justice End of chapter discussion questions A student glossary Chapter opening photos An appendix that includes three additional higher level macro theories which would make the book applicable to Master's level program This book will also contain a

number of features that are essential for any book to be adopted in a HBSE course. They include: End of chapter discussion questions Instructor's manual featuring powerpoint slides and a test bank Student study site for recommended reading, chapter summaries, and flash cards

This new and updated edition of the vital human behavior textbook for graduate-level social work students emphasizes the biopsychosocial framework with a psychodynamic and developmental perspective, with updated information on contemporary thinking and the application of postmodern theory. Written from the perspective of a classroom teacher, faculty advisor, and clinician, *Human Behavior in the Social Environment* discusses current social issues such as older people, violence, and abuse. The book approaches development through the life cycle, discussing the developmental challenges, tasks, and problems of each stage. Presenting complex concepts in a clear and understandable way, it also examines and integrates systems and organizational factors, as well as the impact of culture on clients and treatment programs. A helpful instructor's manual accompanies this text, and is available as a free download from <http://www.routledge.com/9780789034182>. *Human Behavior in the Social Environment* looks at: the biopsychosocial perspective psychoanalytic and ego psychology theories object relations, self psychology, and cognitive-behavioral theories postmodern theories: constructivism, relational therapy, narrative theory, and resilience social systems in the community culture and diversity forms and organizations of the family internal family structures and special family problems reproductive issues, infancy, and early childhood development, middle childhood and adolescence adult development life transitions, turning points, crises, and loss illness and disability; mental health problems and much more! With case vignettes, chapter-by-chapter learning exercises, and additional readings, as well as material from literary works, biographies, and newspapers, this copiously-referenced volume illustrates the complexities of human existence, the multiple social conflicts operating in society, and the relevance of social policy dilemmas. While especially designed to benefit and enlighten graduate social work students it is also a valuable resource for undergraduate social work students as well as beginning and advanced readers in human services such as nursing, medicine, public health, clinical psychology, counseling, who will find this both a helpful review and source of new knowledge.

An accessible and engaging guide to the study of human behavior in the social environment, covering every major theoretical approach Providing an overview of the major human behavioral theories used to guide social work practice with individuals, families, small groups, and organizations, *Human Behavior in the Social Environment* examines a different theoretical approach in each chapter—from its historical and conceptual origins to its relevance to social work and clinical applications. Each chapter draws on a theoretical approach to foster understanding of normative individual human development and the etiology of dysfunctional behavior, as well as to provide guidance in the application of social work intervention. Edited by a team of scholars, *Human Behavior in the Social Environment* addresses the Council on Social Work Education's required competencies for accreditation (EPAS) and explores: Respondent Learning theory Operant Learning theory Cognitive-Behavioral theory Attachment theory Psychosocial theory Person-Centered theory Genetic theory Ecosystems theory Small Group theory Family Systems theory Organizational theory

This book provides a good deal of content to support practice with individuals and families, the mainstay of social work practice. Three chapters are devoted to the individual life span, another to theories about the individual as a social system, and two others to the concept of person-in-environment. Yet, the major contribution of the book [is] its in-depth coverage of the communities, organizations, groups, and families in which individuals live. -Pref.

Using a biopsychosocial perspective, this book demonstrates that there are many ways of knowing, many methods of inquiry, and several perspectives that can guide one's understanding of human behavior. The conceptual frameworks upon which this book is based are resilience and meaning-making. Themes throughout are capacity, context and constitution. Pedagogical devices to aid the student include chapter overviews, case studies, and end of chapter questions.
