Animal communication is not symbolic, so it cannot preserve ideas of the past. Biology

The Difference Between Animal and Human Communication ... How Human Language Is Different From Animal Communication It is more factual and accurate to evaluate and admire an animal's intelligence by looking at its own innate biological abilities than by how much human language it can learn. In fact, the way humans and animals can bond and connect without language makes it all the more remarkable.

How Human Language Is Different From Animal Communication

Let ' s take a look at how human language and animal communication differ from each other. Evidence shows that while parrots can be taught a few words and taught how to count a few numbers, it ' s essentially a game or a party trick for them, and definitely not a mode of expression. (Image: SantiPhotoSS/Shutterstock) Charles Hockett was probably one of the most prominent linguists in America, and a while ago he listed 13 features that distinguish human language from animal communication.

Features That Distinguish Human Language From Animal ...

Only humans have language because only humans are capable of rule-based abstract signing. Animals can often employ complex signals but no animal uses rule-based designators. Animals that can be trained to communicate using " language " (such as parrots or apes) are using words as signals, not as designators.
