Heritage Speakers of Spanish and Study Abroad is an edited volume that provides emerging research on heritage speakers of Spanish in immersion contexts in theoretical, empirical, and programmatic terms. This edited collection seeks to expand our understanding of heritage speakers of Spanish by incorporating research on their linguistic, sociolinguistic, and pragmatic development during and after a sojourn abroad, by discussing the complexities of their identity formation and negotiation during immersive stays, and by highlighting programmatic innovations that could be leveraged to better serve diverse learners in study abroad contexts. This volume advances the fields of both heritage language education and research on immersion study in a variety of ways, and will be of interest to scholars of applied linguistics, sociolinguistics, second language acquisition, and educational linguistics, especially those interested in study abroad programming and Spanish for heritage speakers.

Due to the mortgage crisis of 2008, laws aimed at achieving budgetary and financial stability were enacted. The concept of ?nancial sustainability has been linked to the need of rendering public services without compromising the ability to do so in the future. Financial Sustainability and Intergenerational Equity in Local Governments is a critical scholarly resource that analyzes the financial sustainability of local governments with the aim of ensuring equality and intergenerational equity. Featuring coverage on a broad range of topics such as intergenerational equity, public policies, and sustainability management, this book is geared towards government officials, managers, academicians, practitioners, students, and researchers seeking current research on identifying public policies to ensure financial balance.

The United Nations Arms Trade Treaty became binding international law in late 2014, and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by States Parties, there exists controversy as to the meaning of certain key provisions. Furthermore, the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty, but does not detail how such a body should be established and how it should effectively function. The Arms Trade Treaty: A Commentary explains in detail each of the treaty provisions, the parameters for prohibitions or the denial of transfers, international cooperation and assistance, and implementation obligations and mechanisms. As states ratify and implement the Treaty over the next few years, the commentary provides invaluable guidance to government officials, commentators, and scholars on the meaning of its contentious provisions. This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates. It covers international human rights, trade, disarmament, humanitarian law, criminal law, and state-to-state use of force, as well as the application of the treaty to non-state actors.

Spain is at the epicentre of a crisis that threatens the future of the Eurozone. This book explains the deep historical and structural roots of the current crisis in Spain. It analyses the nexus between European circuits of financial capital, urbanisation, and the emergent dynamics of state austerity and popular revolt.

Evidentiality in communication is better investigated in delimited and recognizable contexts where the multiple levels of meaning in interactional practices are manifested. Taking this viewpoint, the present volume explores the interrelations between evidentials and textual genre in Spanish. Adopting a discursive perspective, all of the chapters examine how the functional category of evidentiality is brought into discourse, which set of linguistic strategies evidentiality makes explicit, what counts as evidence in certain contexts and in certain textual genres, and what particular pragmatic meanings these mechanisms acquire, invoke and project onto the on-going discourse. In particular, this book is concerned with the relationship between evidential expressions and the pragmatic meaning(s) triggered by those expressions, and the role of genre in shaping the evidential meanings. The volume is addressed to both theoretically and empirically minded scholars in the disciplines of Pragmatics, Discourse Analysis, Sociolinguistics, Communication Studies, and Psychology.

What are the linguistic means for expressing different types of foci such as (narrow) information focus and contrastive focus in Romance languages, and why are there such differing views on such a presumably clear-cut research subject? Bringing together original expert work from a variety of linguistic disciplines and perspectives such as language acquisition and language contact, this volume provides a state-of-the-art discussion on central issues of focus realization. These include the interaction between prosody, syntax, and pragmatics, the typology of word order and intonation languages, the differentiation between focus and related notions such as contrast and presupposed modality, and the role of synchronic variation and change. The studies presented in this volume cover a broad range of Romance languages, including French, Italian, Portuguese, and different varieties of Spanish. Moreover, the book also offers new insights into non-Romance languages such as English, German, and Quechua.

The Global Financial Crisis has led to a renewed attention for the management of public debt and deficits of advanced and developing industrial states. To successfully deal with such problems of public finances raises particular concerns in federal states where fiscal competencies are split between two levels of government. This book offers comparative in-depth knowledge of political struggles related to fiscal consolidation policies in eleven federal states since the 1990s, including the Global Financial Crisis and its aftermath. It identifies conditions that lead to "robust" solutions that can both commit federal actors to prudent fiscal policy-making and avoid conflicts between federal actors that cause federal instability. This text will be of key interest to scholars and students of political economy and comparative politics in general and comparative federalism and EU Politics in particular.

... this book is a timely and significant read for anyone with an interest in the operation of the energy sector. Karen Morrow, International Energy Law & Taxation Review This is a timely and comparative assessment of initiatives to promote renewable electricity sources (RES-E) in eight European countries. Carried out by the ProSus research programme at the University of Oslo in cooperation with leading research institutions in each country, the book focuses on the promotional schemes used to foster RES-E in Austria, Denmark, Finland, Ireland, the Netherlands, Norway, Spain and Sweden. The book is unique in that it monitors progress on implementing the EU RES-E Directive in relation to the impact of the dominant energy systems in each country. Employing notions of path dependency/path creation , the analysis demonstrates that crucial lessons for promoting RES-E are to be found in the contextual conditions of national and regional settings; conditions that qualify the effects of more general, market-oriented schemes. The conclusions reached are of direct relevance for the ongoing debate as to the most effective policy instruments for achieving sustainable energy and climate policies in Europe. Promoting Sustainable Electricity in Europe will be of interest to academics and researchers involved in environmental management, energy studies, technology and sustainable development. Furthermore, it will be of interest to policymakers and bureaucrats both at the EU level and among EU/EEA member states concerned with climate change, renewable energy and sustainable development at large. The book should also be of relevance for business organizations and NGOs concerned with the promotion of sustainable electricity.
