For many years, the functioning of the single European market has made it easy for companies to establish themselves and do business throughout the European Union--unless, that is, they failed. In that case, until recently, a company became subject to the insolvency laws of each individual country. The divergence among these laws seemed far beyond the possibility of harmonisation. During the last few years, however, a twofold development is bringing relief. First, thanks to the European Regulation on Insolvency and the UNCITRAL Model Insolvency Laws, jurisdictional issues can be resolved and determined in cases where more than one country is affected by the insolvency of a particular enterprise. Second--and far more promising--stated EU policy goals urging a convergence in thinking on substantive insolvency issues at the Member State level are bearing fruit in reforms that abandon extreme or unusual features and open more common ground. Spearheading these reforms are statutory corporate insolvency procedures that offer an alternative to liquidation--procedures grouped under the heading of corporate rescue. In this book eleven outstanding European insolvency law specialists, representing both practitioners and academics, investigate significant changes in corporate rescue laws that have either already been implemented or that are on the law reform agenda. The essays include expert analyses and evaluations of corporate rescue laws in each of six EU Member States--France, Germany, Italy, Spain, Sweden, and the United Kingdom--as well as insightful discussions of the broader European context. Because corporate rescue is the lifeblood of insolvency law, it is likely to be this aspect that has the greatest role to play in the economic and social development of the European Union. For this reason--and because of the obvious beneficial value of corporate rescue in ensuring fair treatment of creditors and protection of debtors, as well as in reducing the level of stigma attached to insolvency--"Corporate Rescue in Europe will be valued by company lawyers and law firms throughout Europe, and in particular to those handling bankruptcy and insolvency proceedings.

Everyone on this earth, without any exception, wishes to do exceedingly well on a continuing basis in his or her business or chosen profession. The inherent desire is to create value and live a meaningful life for the benefit of everyone. For achieving this, one needs to have a good understanding of the relationship between Value Creation and Finance. Firstly, this book will empower you with this understanding. Secondly, this book will also help you understand what drives businessmen across the world in their decision-making process, at times involving billions of dollars. Likewise, it will familiarise you with the main drivers used by the members of Top Management across the globe for controlling businesses which are spread all over the world or the ones which are confined to the boundaries of one country. Likewise, from reading this book, you will gain a very good understanding of the core financial statements which reflect the financial performance, position and management of business resources. You will realise that these financial statements not only are informative but interesting as well. From reading this book, you will also get answers to many of your questions relating to finance which you always wanted someone to answer for so many years. Even though the book is on finance, it is written in a very simple manner, totally devoid of unnecessary jargon, to make it not only easy for you to understand but also simple to apply in your day-to-day life for achieving greater Value Creation.

Written by IMF's Legal Department, this book outlines the key issues involved in designing and implementing orderly and effective insolvency procedures, which play a critical role in fostering growth and competitiveness and may also assist in the prevention and resolution of financial crises. The book draws on lessons learned from firsthand experience by some of the IMF's 182 member countries. It includes an analysis of the major policy choices that countries need to address when designing an insolvency system, a discussion of the advantages and disadvantages of these choices, and a number of specific recommendations.
