A comprehensive second edition of Cambridge IGCSE® Geography, revised for first examination from 2016. The only revision guide endorsed by Cambridge International Examinations for the 0460 syllabus. From tourism in Kenya to the summit of an active volcano in Japan, this revision guide helps students understand the processes that affect physical and human environments on a local, regional and global scale. The narrative style of the revision guide, with detailed explanations, complements the range of activities in the coursebook. Exam-style questions, international case studies and example maps, give students practice with course content in preparation for assessment. Sample answers to all the questions are in the back of the book.

Assessment and evaluation are two concepts at the core of schooling which are also central to other forms of education worldwide. In an international context, assessment and evaluation data are increasingly widely used for accountability and quality assurance purposes at individual student, institutional, national and global levels. This book does not attempt to include consideration of all the issues that could possibly be covered in a title that addresses assessment and evaluation in education internationally. Nor has it set out to cover the myriad technical issues with which assessment and evaluation are inevitably concerned. Rather, a number of authors working within different contexts of international education (whether as teachers or leaders in international schools, administrators in international examination bodies, or researchers in international educational research organisations) have been invited to share ideas arising from their own experiences of what might be interpreted as assessment or evaluation, be that assessment of student achievement, evaluation of teacher effectiveness or evaluation of school quality. The international dimension presents a range of challenges to those with responsibility for implementing assessment and evaluation strategies in widely diverse linguistic, cultural, social and personal contexts, and in this book valuable contributions are shared by colleagues who are authorities in the field. It is their personal views on assessment and evaluation, derived from professional practice in the international sphere, that have been brought together here.

A key resource for the IGCSE Geography specification, written by leading and experienced Geography teachers and authors. This book has been carefully prepared to cover the full curriculum for the University of Cambridge International Examinations IGCSE course in Geography. It is accompanied by a CD-ROM offering invaluable study and revision support.
