This textbook is intended for introductory immunology courses for medical students, advanced undergraduate biology students, or graduate students. It covers immunobiology and innate immunity, the recognition of antigen, the development of mature lymphocyte receptor repertoires, the adaptive immune response, the immune system in health and disease,

Immunobiology: The Immune System in Health and Disease ...

Janeway's Immunobiology has been such a standard in the field that it is revered. It is an indepth study across a range of subjects in Immunobiology the text is concise and articulate but the real strength of this book are the figures. They are really well done and help visualise some of the most abstract concepts of immunology.
