The injector pump on a diesel engine pushes the fuel to the engine and makes sure it's at the proper pressure. If this pump fails, the engine won't get the fuel it needs to run. To fix the problem, the diesel injector pump must be taken off of the vehicle and replaced with a new one. This repair should take less than an hour to complete.

Step 2: Select 'Prog.Inject.Codes'. Step 3: Follow on screen prompts to select the vehicle. Select 'Injector Programming' and scroll up or down for correct Injector/Cylinder and press 'Select'. Step 4: Using the on-screen directions, change the existing code to the new number supplied and select 'Write to ECU'.

### **How to code diesel injectors - Professional Motor Mechanic**

Are the fuel injectors causing the engine to misfire? Fuel injection is essentially a computer controlled method of delivering fuel under pressure. Based on the signals from the coolant temperature, manifold vacuum, exhaust oxygen sensor and engine cranking sensor, the computer monitors this and initiates the fuel injectors to release and adjust fuel.

Problem #4 – Bad Injector Timing. Whenever the fuel injector pump's O-rings or ball seats are defective, the timing of the fuel transfer process is disrupted. This is a common diesel fuel injector pump glitch, and usually requires a complete injection pump rebuild or replacement.

### **Troubleshooting Diesel Engine Fuel Injection Pump Problems**

Fuel injection is the introduction of fuel in an internal combustion engine, most commonly automotive engines, by the means of an injector. All diesel engines use fuel injection by design. Petrol engines can use gasoline direct injection, where the fuel is directly delivered into the combustion chamber, or indirect injection where the fuel is mixed with air before the intake stroke.

Fuel injectors can become clogged due to the build-up of rust which often arrives through the fuel rail or fuel supply line. Often rust is the result of poor maintenance when your car is in an idle state. Dirty Fuel Injectors; If your fuel injectors are dirty this can lead to a weak or inconsistent spray of fuel inhibiting engine performance.
