Internal Medicine

Internal medicine or general internal medicine (in Commonwealth nations) is the medical specialty dealing with the prevention, diagnosis, and treatment of internal diseases. Physicians specializing in internal medicine are called internists, or physicians (without a modifier) in Commonwealth nations. Internists are skilled in the management of patients who have undifferentiated or multi-system disease processes.

Internal medicine - Wikipedia

Internal Medicine is one of six National Programmes of Care (NPoCs) overseeing the commissioning of

specialised and highly specialised services. The role of the NPoC is to provide leadership and oversight of the development and delivery of a comprehensive work programme that achieves demonstrable improvements in the quality, equity, value and outcomes of commissioned specialised services.

### NHS commissioning » Internal Medicine

Internal medicine is a great field for those who appreciate variety. In fact, it's one of the reasons Dr. Fuchs ultimately pursued the specialty. "It wasn't really a default choice," he clarifies. "It was an all-of-the-above choice for me. I didn't want to limit myself to just fixing a patient's heart or their hormones."

### What Is Internal Medicine? An Inside Look at the Role of ...

Internal Medicine Training (IMT) forms the first stage of specialty training for most doctors training in physicianly specialties and will prepare trainees for participating in the acute medical take at a senior level and managing patients with acute and chronic medical problems in outpatient and inpatient settings.
