introduction to java programming 9th edition - PDF Free ...

Write a program that prompts the user to enter the latitude and longitude of two points on the earth in degrees and displays its great circle distance. The average earth radius is 6,371.01 km. Note that you need to convert the degrees into radians using the `Math.toRadians` method since the Java trigonometric methods use radians.

Methods | Introduction to Java Programming 9th

Introduction to Java Java is a programming language as well as a platform. Java provides several exciting features that make programming convenient and easier. It can be used to create various types of computer applications. It is designed to deliver and run highly interactive, dynamic and secure
