The Broadview Introduction to Philosophy Volume I ...

Only so much seems necessary, by way of introduction of premonition, that there are two sources of human knowledge (which probably spring from a common, but to us unknown root), namely, sense and understanding.

This book introduces the central issues of metaphysics and epistemology, from skepticism, justification, and perception to universals, personal identity, and free will. Though topically organized, the book integrates positions and examples from the history of philosophy. Plato, Descartes, and Leibniz are discussed alongside Quine, Kripke, and Haslanger. Peripheral ideas and related historical asides are offered in boxes interspersed within the text, providing further depth without disrupting the author's lucid explanations of central themes and arguments. Original illustrations by Gillian Wilson are included throughout, giving interesting and clear visual representations of many of the book's examples and thought experiments.

Epistemology or the theory of knowledge is one of the cornerstones of analytic philosophy, and this book provides a clear and accessible introduction to the subject. It discusses some of the main theories of justification, including foundationalism, coherentism, reliabilism, and virtue epistemology. Other topics include the Gettier problem, internalism and externalism, skepticism, the problem of epistemic circularity, the problem of the criterion, a priori knowledge, and naturalized epistemology. Intended primarily for students taking a first class in epistemology, this lucid and well-written text would also

provide an excellent introduction for anyone interested in knowing more about this important area of philosophy.

This is the only contemporary text to cover both epistemology and philosophy of mind at an introductory level. It also serves as a general introduction to philosophy: it discusses the nature and methods of philosophy as well as basic logical tools of the trade. The book is divided into three parts. The first focuses on knowledge, in particular, skepticism and knowledge of the external world, and knowledge of language. The second focuses on mind, including the metaphysics of mind and freedom of will. The third brings together knowledge and mind, discussing knowledge of mind (other minds and our own) and naturalism and how epistemology and philosophy of mind come together in contemporary cognitive science. Throughout, the authors take into account the needs of the beginning philosophy student. They have made very effort to ensure accessibility while preserving accuracy.

A Problem-Centered, Argument-Driven Approach to Teaching Philosophy. Jacobsen's *An Introduction to Philosophy: Knowledge and Reality* is a single-authored approach which provides interpretations and contextualization and some anthologized material. The goal of this text is to decrease student dependence on their teachers, and increase their engagement with philosophy, without diluting the challenges that are an essential part of learning to philosophize.

A short account of the philosophy of knowledge for students reading philosophy for the first time. It also serves as a general introduction to those interested in the subject. Jennifer Trusted examines the nature of philosophy as a subject for study and suggests that it has practical use as well as intellectual appeal since it is concerned with developing our understanding through critical appraisal of the concepts we use, so making our problems clear. Dr Trusted also looks at the approach of some of the leading philosophers of the western world to the philosophy of knowledge. The views of Plato, Aristotle, Descartes, Locke, Berkeley, Hume and Kant are considered. There are two chapters principally concerned with the views of the twentieth-century philosophers: A.J. Ayer and Norman Malcolm. The concluding chapter summarises the various approaches and the way they contribute to clarifying our ideas.
