Iso 14801

ISO 14801:2016 specifies a method of dynamic testing of single post endosseous dental implants of the transmucosal type in combination with their premanufactured prosthetic components. It is most useful for comparing endosseous dental implants of different designs or sizes. This International Standard is not a test of the fundamental fatigue properties of the materials from which the ...

ISO 14001 is an international standard in designing and implementing environmental management systems (EMS) that organizations can voluntarily certify for. ISO 14001 certification enhances green credentials, which subsequently boosts business image, improves cost control, and reduces accidents or incidents caused by environmental factors.
