A Concise, Comprehensive Approach to
Java Programming Java Foundations is a
comprehensive textbook for introductory
programming sequences. The versatile
layout supports a two-or three-semester
schedule and introduces you to the world
of programming--from the basics, to
complex data structures. Inspired by the
success of their highly successful text,
Java Software Solutions, authors Lewis,
DePasquale and Chase build a solid
framework for lasting comprehension. The
Fourth Edition is updated and revised to

keep the content fully up-to-speed while incorporating changes from user feedback. One such revision is maintaining a section on Swing in addition to a separate chapter dedicated to JavaFX. Although JavaFX is slated to replace Swing as the main graphics package in Java, the large amount of existing Swing code will continue to make it relevant for some time to come. The overall flow of the text is redesigned for intuitive progression through programming discussions and problem solving.

An overview of the programming language's fundamentals covers syntax, initialization, implementation, classes, error handling, objects, applets, multiple threads, projects, and network programming.

The fourth edition of Java Software Structures embraces the enhancements of the latest version of Java, where all structures and collections are based on generics. The framework of the text walks the reader through three main areas: conceptualization, explanation, and implementation, allowing for a consistent and coherent introduction to data structures. Readers will learn how to develop high-quality software systems using well-designed collections and algorithms.
