practitioners to engineer finance and
investment tools. The methods developed
and implemented in the text are organized
as chapters which cover the core areas.

~~—Java Methods for Financial Engineering
on Apple Books~~

A Java method is a collection of statements
that are grouped together to perform an
operation. When you call the
System.out.println() method, for example,
the system actually executes several
statements in order to display a message on
the console. Now you will learn how to
create your own methods with or without
return values, invoke a method with or
without parameters, and apply method ...
