lots of people on lots of different carbureted compact cars and trucks.

Electronic fuel injection (EFI) is now the rule and carburetors the exception. That leaves many people out in the cold when it comes to sorting out a downdraft Weber carb, but there are still a lot of people using DGVs on the old 2T-C, 3T-C, and

leaner fuels. Some symptoms of a lean fuel condition are needing to adjust the idle too high, rough idle, hesitation or a stumble on acceleration, a flat spot at around 2500 RPM and/or surging at a constant RPM in higher gears. Along with leaner fuels, any modifications to an engine to improve performance can
