AVMA - Journal of the American Veterinary Medical Association

Experimental studies in the 1980's recognized an association between insulin dysregulation (ID) and laminitis in ponies. 1, 2 Equine metabolic syndrome (EMS) was more thoroughly described subsequently 3 and, in 2010, an American College of Veterinary Internal Medicine consensus statement on EMS was published. 4 The advantage of recognizing EMS is to identify animals with increased risk of laminitis and to allow implementation of evidence-based prevention strategies. The aim of this ECEIM ...
