Abstract.

Tropical forests offer many more products than the category for which they are best known, viz. wood products.

They can supply a host of raw materials, such as resins, oils, fibres and

Get Free Journal Tropical Forest Products

fruits, which collectively represent a commercial value far higher than is generally recognized.

"The loss of large areas of tropical forests has become a major concern of the world community.

Although there are many causes of tropical deforestation and forest degradation, an

Get Free Journal Tropical Forest Products

important cause appears to be an undervaluation of forests by markets and governments. One reason for this undervaluation is that many forest products, such as food and medicinal products, are traded in

Get Free Journal Tropical Informal Markets

for which there are little data. Another reason is that many services provided by forests, such as carbon storage, biodiversity protection, recreation, and watershed protection, are

Get Free Journal Tropical Forest Products

not traded in markets; hence, their economic values are often ignored. Even where environmental values are recognized, they may not be measured or used to promote efficient resource

Get Free Journal Tropical Forest Products

This volume examines some causes of tropical deforestation and explores forest valuation issues in context of a protected area project. The study sets out the context of tropical

Get Free Journal Tropical Deforestation and Products

and loss of biodiversity and provides a framework for examining the economic value of forests. It also presents a detailed case study of Madagascar that illustrates the practical
