Yet the marketplace of natural healing can be a highly unregulated one full of hearsay, trends, and half truths. Too much misinformation! Few trusted sources are available to clearly explain both the good and bad sides of the herb and supplement story. The Christian's Guide to Natural Products & Remedies offers the respected integrity of Dr. Frank Minirth and collective wisdom of his associates for a thorough, Bible-informed approach to mind and body health. Dynamic commentary and Q & A chapters address natural healing from every direction, followed by invaluable sections on herb and supplement profiles, drug and herb interaction studies, and much more. Alcohol use disorder (AUD) is a major public health problem in the United States. The estimated 12-month and lifetime prevalence values for AUD are 13.9% and 29.1%, respectively, with approximately half of individuals with lifetime AUD having a severe disorder. AUD and its sequelae also account for significant excess mortality and cost the United States more than \$200 billion annually. Despite its high prevalence and numerous negative consequences, AUD remains undertreated. In fact, fewer than 1 in 10 individuals in the United States with a 12-month diagnosis of AUD receive any treatment. Nevertheless, effective and evidence-based interventions are available, and treatment is associated with reductions in the risk of relapse and AUD-associated mortality. The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder seeks to reduce these substantial psychosocial and public health consequences of AUD for millions of affected individuals. The guideline focuses specifically on evidence-based pharmacological treatments for AUD in outpatient settings and

includes additional information on assessment and treatment planning, which are an integral part of using pharmacotherapy to treat AUD. In addition to reviewing the available evidence on the use of AUD pharmacotherapy, the guideline offers clear, concise, and actionable recommendation statements, each of which is given a rating that reflects the level of confidence that potential benefits of an intervention outweigh potential harms. The guideline provides guidance on implementing these recommendations into clinical practice, with the goal of improving quality of care and treatment outcomes of AUD.

Does your personality match your choice of major? Is Facebook bringing you down? How might changing your habits help you get your Z's? Why are some people drawn to ride monster roller coasters? Written in an engaging style that speaks directly to the reader with examples of psychological concepts drawn from daily life, Nevid's *ESSENTIALS OF PSYCHOLOGY: CONCEPTS AND APPLICATIONS*, 6th Edition, makes the study of psychology come alive while providing solid grounding in key knowledge to help you succeed in the course. An effective learning system helps you absorb and remember important information, while numerous hands-on activities enable you to apply what you learn. This edition also includes an expanded focus on psychology in the digital world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The book's compelling narrative demonstrates that, in many cases, it is possible to achieve a stable recovery and return to—or even experience for the first time—a life free of crippling anxiety and depression.

It gives me immense pleasure to welcome all to explore/publish/comment in/on our journal, *The International Journal of Indian Psychology (IJIP)*. There are a lot of challenges which the growing psychological face in the realms of basic necessities in life. Psychological thoughts can play a very distinct role in bringing about this change. One of the key objectives of research should be its usability and application. This journal attempts to document and spark a debate on the research focused on psychological research and ideas in context of emerging geographies. The sectors could range from psychological education and improvement, mental health, environmental issues and solution, health care and medicine and psychological related areas. The key focus would however be the emerging sectors and research which discusses application and usability in social or health context. We intended to publish case reports, review articles, with main focus on original research articles. Over objective is to reach all the psychological practitioners, who have knowledge and interest

but have no time to record the interesting cases, research activities and new innovative procedures which helps us in updating our knowledge and improving our treatment. Finally, I would like to thank RED'SHINE International Publications, Inc for this keepsake, and my editorial team, technical team, authors and well wishers, who are promoting this journals. With these words, I conclude and promise that the standards policies will be maintained. We hope that the research featured here sets up many new milestones. I look forward to make this endeavour very meaningful.
