In 1983, Kawasaki introduced the third evolution in the GPz line, known as the ZX1100-A1. While it still carried the GPz name, it was a thoroughly freshened bike with all-new styling, including a larger fairing and a much more graceful, wind-cheating design. A lower fairing was an option, providing a fully faired bike that still displayed the engine a bit.

The Kawasaki GPz1100 B1 and B2 are motorcycles that were manufactured by Kawasaki in 1981 and 1982 respectively. Both models featured a four-cylinder, two-valve air-cooled engine design with a capacity of 1,089 cc. This engine was an evolution of the powerplant used in the previous Kz1000 series, itself descended from the Z1.

The 1981 GPz1100 was the first 1,100 cc motorcycle released by Kawasaki. It was officially marketed as the GPz1100 B1. Its frame design was a typical cradle design and the engine was based on the earlier Mk2 engines of the z1000H and z1000J, but the engine capacity was increased to 1,089 cc.

~~Kawasaki GPz 1100 / ZX1100 — motorcyclespecs.co.za~~

Compared with the KZ1000, the 1100 got a larger bore, a lighter crankshaft, revised valve timing, more valve lift, higher compression ratio and bigger valves, all of which is standard hot rod stuff. The GPz also got electronic fuel injection, which is big buck high tech not-quite hot rod stuff.
