This guide is for a set of Keihin carburetors from a Honda CBR250RR MC22.

However, it could be useful for other models that use Keihin carburetors. When disassembling your carbs, take as many photos as necessary. Note that most parts books and manuals do not show the details of the parts and assembly of the carburetors when they are separated. Most of them will show all of the internal jets etc, but very little of the external fittings that are between the carbs, such as springs and ...

Pour the carburetor cleaner in a bucket and soak the carburetor for one hour. Set the carburetor on a clean shop rag to let the excess carburetor cleaner drip off. Dry the carburetor thoroughly by spraying the carburetor with the can of compressed air. Reattach the carburetor to the Seadoo engine block, using the screwdriver.

All Keihin carburetors are pre-jetted for bolt-on operation. Carburetors are jetted using stock motorcycles and watercrafts. Any major engine modifications like higher compression pistons and racing exhaust systems may require minor jetting adjustments. The following is a guideline for jetting Keihin carburetors.
