My kohler marine generator (7.3E)

quits after running for approx 6

minutes. Appears to be running out of

fuel. The unit is plumbed into the same

valve that supplies my main engine

(which runs with no issues). I have

Online Library Kohler 7 3 E Generator Manual

changed filters, and confirmed fuel supply with same results. Don't know what to look at next.

Found an issue with my generator.
Here's how i fixed it

Kohler generator repair - YouTube
I have a 2008 341 with the Kohler 7.3ECD generator. It's worked fine for quite awhile and recently I started having issues where it would shut down and throw fault codes. All codes indicated cooling issues, so my first thing was to just replace the impeller to confirm that wasn't an issue.
