LABORATORY MANUAL

As chemistry labs are one of the most common types, these basic chemistry lab safety rules are relevant to many scientists, dealing with the safe performance of common activities and tasks in the average chemistry lab:

Before you start an experiment, make sure you are fully aware of the hazards of the materials you'll be using.

Having drinks in the lab risks your experiment, too. You could spill a drink on your research or lab notebook. Eating and drinking in the lab is a form of distraction. If you are eating, you aren't concentrating on your work. If you're used to drinking liquids in the lab, you might accidentally reach for and drink the wrong liquid.
