"What's going on in this picture?" With this one question and a carefully chosen work of art, teachers can start their students down a path toward deeper learning and other skills now encouraged by the Common Core State Standards. The Visual Thinking Strategies (VTS) teaching method has been successfully implemented in schools, districts, and cultural institutions nationwide, including bilingual schools in California, West Orange Public Schools in New Jersey, and

the San Francisco Museum of Modern Art. It provides for open-ended yet highly structured discussions of visual art, and significantly increases students' critical thinking, language, and literacy skills along the way. Philip Yenawine, former education director of New York's Museum of Modern Art and cocreator of the VTS curriculum, writes engagingly about his years of experience with elementary school students in the classroom. He reveals how VTS was developed and demonstrates how teachers are using art—as well as poems, primary documents, and other visual artifacts—to increase a variety of skills, including writing, listening, and speaking, across a range of subjects. The book shows how VTS can be easily and effectively integrated into elementary classroom lessons in just ten hours of a school

The title of our volume on interdisciplinary semiotics is situated in a geographical metaphor and points to the possibility of uncovering meanings through shifting perspectives as well as to the possibility of understanding how these various modes of meaning are articulated and framed in particular cultural instances. Regardless of medium, semiotic rotations permit play between the surface and underlying levels of a communication, reveal the relationship between open and closed systems of signification, and modulate shades of meaning caught between the visible and invisible. Readerly play in these sets of apparent oppositions

reveals that the less each pairing is held to be a coupling of oppositions and the more they are observed through perspectives gained by semiotic rotations, then the more complex and rich the modes of meaning may become.

Navigating Opportunity grows out of the 3rd National Developmental Conference on Debate, held at Wake Forest University in June 2009. It represents a commanding account of the state of policy debate in the United States. The book presents researched discussions compiled by ten working groups as well as twelve original essays examining where debate is moving from international debate opportunities to pedagogical innovations. The volume also features a provocative keynote by William Keith, author of the award-

In recent years a new trend in socio-cognitive research investigates into the mental capacities that allow humans to relate to each other and to engage in social interactions. One of the main streams is the study of intersubjectivity, namely the 'mutual sharing of experiences', conceived of as a basic dimension of consciousness on which socialness is grounded. At the very heart of contemporary studies is an intense debate around some central questions that concern the nature and forms of human intersubjectivity, its development and its role in situated joint activities. Striving to achieve a unified theoretical framework, these studies are
