Wire wrapping can be said to be one of the oldest if not the oldest technique for creating handmade jewelry. Wire wrapping can simply be defined as taking wire and folding it over itself or beads as well as different mechanisms to produce gems or jewelries. It is carried out using jewelry wires and findings. These findings are very similar to wire. For instance head-pins and are used to create different components. These wire components are then connected together by making use of mechanical means without heating or soldering the wire. This method often involves taking a wire and then bending it to form a loop or several other decorative shapes and that you thereafter wrap the wire around itself to complete the making of the wire component. This is what makes the decorative shape or loop you created to last long. In this book, I have put together everything you need to learn how to make wire wrap jewelry.
