This book covers the Linux Mint 17 release (Qiana), focusing on desktops and administrative tools. The emphasis here is on what users will face when using Mint, covering topics like installation, applications, software management, the Mint desktops (Cinnamon, Mate, and KDE), shell commands, network connections, and system administration tasks. Linux Mint 17 is based on the Ubuntu 14.04 long-term support release. The Cinnamon, Mate, and Linux Mint KDE desktops are examined in detail. Cinnamon and Mate have custom Mint menus to manage access to applications and devices. Advanced components are also examined such as the Mint display Manager (MDM), PulseAudio sound configuration, and Mint software management applications (Software Manager and Update Manager). Administration topics include system tools, managing users, file systems, Bluetooth setup, printer configuration, and network folder and file sharing. In addition configuration of wired and wireless connections, firewalls (the Gufw and FirewallD), and service management (Upstart) are covered. Shared resources are also examined, including the CUPS printing server, the NFS Linux network file server, and Samba Windows file and printing server.

How far can you fall? Caspar had once shone brighter than any star in the sky. He led an exciting life, had a good job and the love of his family. Now he barely survives in a village where he's shunned by everyone, even his parents. Unemployed, unemployable, he consoles himself with stringless sex-lots of it. How hard can you land? Ally escapes death by a whisker when she falls in front of a train. Not an accident, someone pushed her, and she doesn't hang around to give them another shot. But she finds herself falling in a different way when she meets Caspar, and she plummets hard and fast. He's dark, he's brooding, and he's hotter than any man she's ever met. How high can they soar? With Ally's adversary closing in, plus Caspar's tendency to screw things up, if they don't open their arms and catch each other, they'll burn up in an atmosphere determined to keep them apart.
