Goals: The goals of the lessons are to give all students the chance to: (1) extend their understanding of the place value system to include decimals; (2) learn how decimals relate to fractions; (3) represent, read, and interpret decimal numerals; (4) compare decimal numerals; and (5) learn what percents are and how they relate to fractions and decimals.

Printable Lesson Plan On Fractions, Decimals, and Percents

Introduction asks students to brainstorm and identify as many different uses of percentages in everyday life. After this, students are introduced to the method of calculating percentages without a calculator, using 10% as the starting point and building block. (eg. Find 36% - first find 10%, then half 10% to find 5%, divide 10% by 10 to find 1%. So  $36\% = (3 \times 10\%) + 5\% + 1\%$ .)

Percentages (Non-calculator method) | Teaching Resources
