In the past she also worked as researcher, tutor and professor's assistant in the field of ecology at "Dipartimento di Biologia Animale ... Internazionale del Libro di Torino (Turin Book ...

Organized around the central theme of homeostasis, **FUNDAMENTALS OF HUMAN PHYSIOLOGY** is a carefully condensed version of Lauralee Sherwood's **HUMAN PHYSIOLOGY: FROM CELLS TO SYSTEMS**. It provides clear, current, concise, clinically oriented coverage of physiology. Many analogies and frequent references to everyday experiences help students relate to the physiology concepts presented. Offering helpful art and pedagogical features, Sherwood promotes understanding of the basic principles and concepts of physiology rather than memorization of details and provides a foundation for future careers in the health professions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Modern Quantum Mechanics is a classic graduate level textbook, covering the main quantum mechanics concepts in a clear, organized and engaging manner. The author, Jun John Sakurai, was a renowned theorist in particle theory. The second edition, revised by Jim Napolitano, introduces topics that extend the text's usefulness into the twenty-first century, such as advanced mathematical techniques associated with quantum mechanical calculations, while at the same time retaining classic developments such as neutron interferometer experiments, Feynman path integrals, correlation measurements, and Bell's inequality. A solution manual for instructors using this textbook can be downloaded from www.cambridge.org/9781108422413.
