This book is not just about air travel. It is about the emergent social world of flying. It concerns air space and behavior in the air the way someone else might look at cities and street behavior. Economic, political, and cultural aspects are all considered. . . . Airports have now become specific places in their own right that, in a certain sense, now. . . are very much like cities. Frequent flying also has produced its very own culture. Rules of behavior are subscribed to in the air. Unique behaviors at terminals and in the passenger cabin have emerged

--VANITY FAIR Living legend and presenter of BBC's Planet Earth series Sir David Attenborough tells the story of his early career as a broadcaster and a naturalist in his own words. In 1954, David Attenborough, a young television presenter, was offered the opportunity of a lifetime--to travel the world finding rare and elusive animals for the London Zoo's collection, and to film the expedition for the BBC for a new show called Zoo Quest. This is the story of those voyages. Staying with local tribes

In this meticulously researched and lavishly illustrated account, Mike Brown and Carol Harris draw on contemporary sources
