Enamelling on Copper highlights the unique interactions between copper and enamels, and gives a detailed account of working with this wonderful combination. The basic technique - simply sifting ground enamels onto a copper surface and firing the two in a kiln for one minute - is a thrilling experience, but delving deeper into the techniques pays even greater rewards. Starting with an introduction to enamels, this new book goes on to explain how to work with an enamelling kiln, including temperatures and timings; the different kinds of enamels and how they work together; the enamelling process and how to

Visiting her father in Taiwan as a child, Lexa thought she'd finally found a place where she belonged. But that was years ago, and even there, some never truly considered her to be a part of the family. When her estranged father dies unexpectedly, leaving the fate of his Taiwanese family in Lexa's hands, she is faced with the choice to return to Taiwan and claim her place in her heritage . . . or leave her Taiwanese family to lose their home for good. Armed with the advice of two half-sisters (one American and the other Taiwanese, who can't stand each other), a

the project. When asked if he really is an expert in the DIY field he says, "According to one dictionary an expert is 'one who has great knowledge or skill in a particular area'". But, in the words of my former wife, "In the case of Michael Hammar, I think an expert is a person who has done something wrong so many times, has finally found the right way, and now wants to be paid to tell people about it". This book is funny and, at the same time, very informative with down to earth stories and ideas. Avoid the "how-not-to" frustrations and chuckle at one man's struggle with home repairs and renovations. See how one "guy" deals with the "boss" on the job. You will surely identify with some of Hammar's experiences and laugh as you learn.

We agonise and argue when choosing it; we admire, compliment and criticise it (or keep politely quiet about it); and the rest of the time we don't even notice it. Wallpaper has been the backdrop to our homes for hundreds of years. It can make a house feel cosy or trendy, modern or traditional, and it is one of the key elements of home décor through which to express personal taste. Despite the threat from plain-painted minimalism, wallpaper maintains a strong presence in modern domestic decoration. Zoë Hendon traces the history of wallpaper in Britain and its foremost designers, examining how social mobility and new technologies have influenced design trends. From early

Wallpaper 's spread across trades, class and gender is charted in this first full-length study of the material 's use in Britain during the long eighteenth century. It examines the types of wallpaper that were designed and produced and the interior spaces it occupied, from the country house to the homes of prosperous townsfolk and gentry, showing that wallpaper was hung by Earls and merchants as well as by aristocratic women. Drawing on a wide range of little known examples of interior schemes and surviving wallpapers, together with unpublished evidence from archives including letters and bills, it charts wallpaper 's evolution across the century from cheap textile imitation to innovative new decorative material.

Wallpaper ' s growth is considered not in terms of chronology, but rather alongside the categories used by eighteenth-century tradesmen and consumers, from plains to flocks, from China papers to papier m â ch é and from stucco papers to materials for creating print rooms. It ends by assessing the ways in which eighteenth-century wallpaper was used to create historicist interiors in the twentieth century. Including a wide range of illustrations, many in colour, the book will be of interest to historians of material culture and design, scholars of art and architectural history as well as practicing designers and those interested in the historic interior.
